INTRODUCTION

Government contact centers play a central role in delivering support to citizens across the country seeking assistance with federal, state, and local government services. With the significant stress placed on government services by COVID-19 lockdowns, the critical role played by contact centers is even more evident.

Government agencies can boost satisfaction among citizens by effectively managing the entire customer experience, from pre-contact visits to the agency website, to direct contact with a contact center agent, to post-contact engagement through social media channels. Effectively managing across the entire experience requires integrated thinking from contact center managers that stretches beyond the specific customer service interaction with a customer.

The CFI Group Government Contact Center Satisfaction Index study measures contact center performance regarding their experience interacting with government customer service. This year’s report provides the latest information on customer experience, key drivers of customer satisfaction, trends in pre-contact website self-service, how interaction with the agent impacts the experience, and how post-contact interaction on social media should be considered part of entire customer service journey.
SURVEY RESPONDENTS AT A GLANCE

### AGE
- 18 to 24: 5%
- 25 to 34: 15%
- 35 to 44: 26%
- 45 to 54: 28%
- 55 to 64: 24%
- 65 and over: 2%

### REASON
- To ask a question about a policy, rule, or regulation: 36%
- To obtain other types of information: 29%
- To request benefits or address an issue related to benefits: 24%
- To check on service hours or make an appointment: 22%
- To file a complaint: 17%
- To change contact information: 8%
- To enroll in a program: 6%
- Other reason: 7%

### INCOME
- $25,000 or less: 16%
- $25,001 to $50,000: 21%
- $50,001 to $100,000: 35%
- Over $100,000: 26%
- Prefer not to answer: 1%

### AGENCY
- State or Local: 37%
- Internal Revenue Service: 12%
- Social Security Administration: 10%
- Medicare or Medicaid: 9%
- Department of Education: 8%
- United States Post Office: 8%
- Other: 18%
OVERALL SATISFACTION INCHES UP

The Government Contact Center Satisfaction Index (GCCSI) is now 64, as measured on a 0-100 scale, up slightly from 2019 and. These results are based on a panel of 700 respondents who had contacted federal agency customer service in the prior 30 days. Data was collected 2/1/20 – 2/24/20 just as the pandemic was beginning to upend the US economy, making corrective actions from the study insights all the more urgent and critical.

Private sector CCSI historically has run a few points higher than the public sector. The gap closed in 2016, but has now broadened again in 2019 and 2020. This report looks at factors that influence the satisfaction of customers contacting the customer service and provides executives with insights into where to invest in those improvement efforts.

SIX DRIVERS OF THE GOVERNMENT CONTACT CENTER EXPERIENCE

To improve customer satisfaction with the government contact center experience and resulting customer actions, contact center managers must prioritize operational improvements among the six elements of the government contact center experience.

<table>
<thead>
<tr>
<th>SATISFACTION DRIVERS</th>
<th>KEY MEASURES</th>
</tr>
</thead>
<tbody>
<tr>
<td>AGENT EFFECTIVENESS</td>
<td>Explaining the process</td>
</tr>
<tr>
<td>AGENT EMPOWERMENT</td>
<td>Policies that make sense</td>
</tr>
<tr>
<td>IVR</td>
<td>Ease of accessing information</td>
</tr>
<tr>
<td>AGENT DEMEANOR</td>
<td>Courteousness</td>
</tr>
<tr>
<td>AGENT KNOWLEDGE</td>
<td>Ability to answer your questions in a timely manner</td>
</tr>
<tr>
<td>AGENT COMMUNICATION</td>
<td>Speaking/writing clearly</td>
</tr>
</tbody>
</table>
SATISFACTION DRIVERS ARE ALL UP FROM 2019

The scores for the six satisfaction drivers have all made gains in 2020. Government continues to lag behind the private sector across most of the six main satisfaction drivers.

<table>
<thead>
<tr>
<th>SATISFACTION DRIVERS</th>
<th>PRIVATE SECTOR</th>
<th>GOVERNMENT</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>2019</td>
<td>Δ</td>
</tr>
<tr>
<td>KNOWLEDGE</td>
<td>72</td>
<td>3%</td>
</tr>
<tr>
<td>EMPOWERMENT</td>
<td>69</td>
<td>4%</td>
</tr>
<tr>
<td>DEMEANOR</td>
<td>52</td>
<td>0%</td>
</tr>
<tr>
<td>EFFECTIVENESS</td>
<td>72</td>
<td>4%</td>
</tr>
<tr>
<td>KNOWLEDGE</td>
<td>74</td>
<td>3%</td>
</tr>
<tr>
<td>COMMUNICATION</td>
<td>78</td>
<td>4%</td>
</tr>
</tbody>
</table>
To prioritize improvement areas, agencies need to consider the impact improvements will have on the overall customer experience. Scores alone will not tell you where to invest in contact center improvements. Only by modeling the customer experience data can contact center agency leadership effectively prioritize initiatives that will impact desired customer actions.

1. **PRE-CONTACT: The Digital Experience**
Our study shows that for all customers who contact customer service, 71% have already tried to resolve the issue by visiting the company website. Trying to resolve an issue before contacting the agency for support is more common for federal government services than for the private sector.

If agencies provide customers with the tools needed to locate information or easily address their problem, customers would not have had to tie up customer service resources to resolve the issue.

One implication to keep in mind is that as more customers are able to resolve simple issues online, those who do contact customer service will increasingly tend to have more complex issues, making the average customer service contact more difficult to handle.
IMPROVED WEBSITES COULD SPELL SIGNIFICANT SAVINGS

The CFI Group Government Websites 2020 study projects that as citizens are able to get the information they need and accomplish their tasks online, fewer phone calls and office visits to agencies results in significant savings. Reducing the percentage of citizens unable to complete their tasks online could dramatically reduce cost by lessening the need for contact centers and office visits.

1. Digital Analytics Program, which collects web traffic from around 400 executive branch government domains across about 5,700 websites, including every cabinet-level department
2. CFI Group 2020 Website Satisfaction Research
3. An estimate of the average cost of completing a call through federal contact centers
4. An estimate of the average cost of an office visit to a federal agency local office

10 BILLION
number of visits to government websites annually¹

1.2 BILLION
unable to accomplish their task²

~3.5 BILLION SAVINGS
31% or 372 Million website visitors call the agency after failing to accomplish task X $9.30 per call³

~2.1 BILLION
18% or 216 Million website visitors visit a local office after failing to accomplish task X $9.30 per visit⁴
CONTACT: The Agent Experience
Despite the growth and ease of digital communications with agencies, phones continue to be the primary method used by citizens to contact customer service. Roughly two out of three (68%) citizens used a phone when contacting an agency’s customer service, particularly when self-service online is not possible. Most people try to solve their issue online before contacting customer service.

This does not mean that contact centers can neglect other channels. Many still use more traditional delayed channels such as email (31%) and online contact forms (22%). Others use faster methods such as social media (15%) and interactive online chat (6%), two channels that have been growing and will continue to grow in 2020 as contact centers increasingly make chat and social media common customer service engagement platforms.
Contact centers create a great customer experience when agents are empowered to make decisions when trying to solve customer issues. Effective agents can deliver on three key metrics: first agent resolution, first call resolution, and low call handle times.

FIRST AGENT RESOLUTION – Only 39% of callers said the issue is resolved with the first agent, resulting in a GCCSI of 67. GCCSI dips slightly if two or more agents are needed to resolve the issue.

FIRST CALL RESOLUTION – Half of all callers said that the issue is resolved the first time, with an average GCCSI of 73. GCCSI declines as the issues required multiple contacts.

CALL HANDLE TIME – 27% of callers say the contact was handled in five minutes or less, and another 22% of all calls were handled within 6-10 minutes. GCCSI remains fairly steady at 66-71 as citizens recognize that agents must take time to resolve an issue for which many have already tried unsuccessfully to resolve on the website.
POST-CONTACT: The Social Experience
CONTACT CENTERS MUST CONTINUE TO MANAGE POST-CONTACT EXPERIENCE

A customer contact doesn’t end when it’s resolved. Customers frequently tell others about their experience, often using social media as a channel. One out of three (36%) shared with someone about their experience contacting a government contact center, and three out of four (75%) do so on one or more social media platforms.

Government contact center executives should actively monitor and engage popular social media platforms to ensure the contact experience is managed completely to conclusion. Facebook (84%), YouTube (42%), Instagram (36%), and Twitter (33%) are the most popular platform for contact centers to monitor and manage.

ABOUT THE APPROACH

CFI Group conducts an annual study of customer satisfaction with contact centers using the proven methodology of the American Customer Satisfaction Index (ACSI). All respondents to the survey have had recent contact with a federal agency service center. The purpose of this study is to provide managers with a better understanding of how to deliver a great customer service experience for customers.

This report analyzes the aggregate set of respondents across the mix of government agencies measured. Data was collected 2/1/20 - 2/24/20 just as the pandemic was beginning to upend the US economy, making corrective actions from the study insights all the more urgent and critical. Given the scope of services provided by government, CFI Group focuses the contact center study on those agencies with which a typical citizen would most likely have an interaction.

Contact centers measured in the GCCSI include:

- Internal Revenue Service (IRS)
- Social Security Administration (SSA)
- Centers for Medicare and Medicaid Service (CMS)
- Department of Veterans Affairs (VA)
- Department of Education (DOE)
- Other Federal Agencies
- State or Local Government

Within this select group, the range of functions the contact center must perform is far-reaching. Centers must provide technical support, give policy information, handle complaints, and potentially play countless other roles.

This year’s GCCSI study continues the exploration of how well government contact centers are delivering services to citizens and resolving their issues across the customer service journey. It examines trends and offers recommendations to improve satisfaction with the services provided by government contact centers.

ABOUT US

Since 1988, CFI Group has delivered customer experience measurement and business insights from its Ann Arbor, Michigan headquarters and a network of global offices. As founding partner of the American Customer Satisfaction Index (ACSI), CFI Group is the only company within the United States licensed to apply customized ACSI methodology in the federal government. Using this patented technology and top research experts, CFI Group helps agencies improve the citizen experience with the federal government.
